EDUCATION

Petra Christian University

2024 – Present

Informatics

GPA: 3.95/4.00

Petra 2 High School

Science

2021 – 2024

EXPERIENCE

Laboratory Assistant

2026 - Present

Petra Christian University

- Opened and managed laboratory operations to support academic activities and practical sessions.
- Maintained computer hardware, software, and laboratory infrastructure to ensure system reliability.
- Assisted students in troubleshooting technical issues related to programming and software usage.
- Performed routine maintenance, software installation, and system configuration across laboratory devices.

Teaching Assistant

2025 - Present

Petra Christian University

- Assisted lecturers in conducting Programming Algorithm courses using Python and Object-Oriented Programming (OOP) courses using Java.
- Guided students during practical sessions and provided academic support for programming assignments.
- Helped review student work and explain programming concepts, algorithms, and software development fundamentals.
- Supported course administration and learning activities throughout the semester.

Private Tutor

2024 – Present

Freelance

- Provided personalized tutoring for high school students in Mathematics and Physics.
- Developed learning strategies tailored to individual student needs and learning styles.
- Assisted students in improving academic performance and problem-solving skills.

ORGANIZATION

IT Coordinator

2025 - 2026

Petra Civil Expo 2026

- Led a team of 4 developers in designing and developing digital systems supporting one of Petra Christian University's largest engineering events.
- Architected the database structure and registration workflow with draft-saving functionality using Laravel Livewire.
- Developed centralized administration systems featuring participant management, attendance verification, checking-day recaps, and Excel reporting.

- Built real-time interactive systems including Tap-Tap Games and Rally Games using Laravel Events and Ably WebSockets.
- Implemented Google Authentication, QR-based attendance systems, and real-time participant synchronization.
- Managed deployment and production infrastructure using cPanel.

Vice IT Coordinator

2025 - Present

Innofashion Show 8

- Led and mentored a team of 3 developers while overseeing backend, frontend, and deployment workflows.
- Designed database architecture and REST APIs using Laravel Sanctum.
- Implemented Permission-Based Access Control (PBAC) using Laravel Spatie for multi-division administrative management.
- Developed event registration, competition registration, QR attendance, participant recap, and evaluation management systems.
- Built dynamic form builders, automated QR ticket generation, and email notification systems.
- Integrated Google Authentication using NextAuth and Laravel Socialite.
- Developed frontend experiences using Next.js, GSAP, and Backend-for-Frontend architecture.
- Managed production deployment for Laravel APIs and Next.js applications.

Information System Department Member

2025 - Present

BEM Petra Christian University

- Served as PIC for the development of BEM Administration Platform used across multiple BEM digital services.
- Developed centralized administration systems integrating BEM Petra Store and BEM Intern services.
- Implemented Role-Based Access Control (RBAC) with route-level permissions and database-driven authorization.
- Developed and maintained frontend interfaces for BEM Intern using Next.js, GSAP, and SVG animations.

Member of IT Division

2025

Welcome Grateful Generation (WGG) 2025

- Developed a starter kit management system for participant distribution tracking.
- Implemented Excel import/export features with automated database synchronization and standardized templates.
- Collaborated in frontend and backend development within a team environment.

SKILLS

Competencies:

Full-Stack Web Development | REST API Architecture | Database Design | Real-Time Systems | Role-Based Access Control (RBAC/PBAC) | SaaS Development | Payment Integration | QR Attendance Systems | Cloud & Server Deployment | Team Leadership | Technical Mentoring

Technologies:

Laravel | Livewire | Next.js | React | Flutter | Go | PHP | JavaScript | TypeScript | MySQL | PostgreSQL | Ably | Midtrans | Firebase | Docker | Linux | Git
